**2004 ANNUAL GROUNDWATER MONITORING PROGRAM-FORMER ITT INDUSTRIES,  
1200 SOUTH FLOWER STREET, BURBANK CALIFORNIA, CLEANUP AND ABATEMENT  
ORDER NO. R4-2004-0003 (FILE NO. 104.0852)**

Dear Ms. Olmsted,

We have received the October 14, 2004 letter prepared on your behalf by ENVIRON International Corporation (ENVIRON) which provides a status of the upcoming 2004 annual groundwater monitoring well sampling activities. The letter states that most of the wells are inaccessible at this time due to the remediation activities at the site by HomeDepot's consultants. However, we have recently visited the site and find enough of the wells are accessible to provide a timely groundwater sampling event that could coincide with the end of year water sampling that will be performed by the U.S. Environmental Protection Agency's (EPA) Remedial Investigation (RI) wells in the area. Regional Board staff are of the understanding that before site grading begins at the site, wells are accessible, and the top casing elevations yet to be disturbed.

Regional Board staff requests a 48-hour notification of field activities, and in order to document the fieldwork.

The due date for submitting the final technical report is **January 20, 2005**. As provided in Section 13268 of the California Water Code, failure to submit the required technical report by the due date specified may result in administrative civil liability penalties being assessed by the Regional Board, in an amount up to one thousand dollars (\$1,000) per day for each day the technical report is not received.

**If you have any questions regarding this matter, please call Mr. Dixon Oriola at (213) 576-6803 or Mr. Alex Lapostol at (213) 576-6807.**

Sincerely,

Dixon Oriola, Unit Chief  
Well Investigation Program
